

Dec-Clad Metal

CRITICAL LEAK POINT PROTECTION

THE PRODUCT ADVANTAGE

Termination has always been a difficult detail in the decking business until now. Dec-Clad metal offers the easiest and most efficient way to terminate membrane details. The metal is fastened to the edge of the deck and the membrane is heat welded to it to ensure waterproofing and great aesthetic finish. There is now no need to wrap the membrane over the face of the deck and risk weakness and water penetration where other systems need to be mechanically fastened.

FEATURES:

- 24 gauge G90 galvanized
- PVC coated metal makes welded terminations easy and watertight
- Color matched to our membranes
- Cut and fit on site

PACKAGING:

- Standard dimensions:
 - 2" x 1.5" x 1/2" x 1/2" » 8' long
- All lengths are 8'
- Flat stock sheets in colored material 3' x 8' size
- Custom profiles available (special order)
